Art and
Design

Lesson Objective: I can plan my Greek building artwork.

Next week you are going to be creating pieces of artwork like these to reflect Ancient Greek archaeology.

To be ready, you need to plan the colours you would like to use as the background and the design of your building.

You will be using different layers of coloured paper and card for the background. Think whether you want natural or bright colours as your background. Do you want certain features like hills or sun?

You will be using art straws to create the Greek Parthenon style building. Think how many pillars you would like. What they look like. What your roof will look like.
