

Calculate the Difference

I can calculate the difference between the volumes of cubes and cuboids.

<p>Shape A</p> 	<p>Shape B</p> 	<p>Shape C</p> 
<p>Shape D</p> 	<p>Shape E</p> 	<p>Shape F</p> 

Calculate the difference in volume between the shapes:

1. Shape A and Shape B	2. Shape E and Shape F
3. Shape B and Shape E	4. Shape C and Shape F

5. A composite shape is made up of 2 of the cuboids. The total volume of the shape is greater than 180cm^3 and less than 200cm^3 . Which 2 cuboids could it be?

6. Cuboid C and which other cuboid have a combined volume of 384.8cm^3 ?

Calculate the Difference **Answers**

Calculate the difference in volume between the shapes:

1. Shape A and Shape B 29.6cm^3	2. Shape E and Shape F 26.4cm^3
3. Shape B and Shape E 37.2cm^3	4. Shape C and Shape F 147.2cm^3

5. A composite shape is made up of 2 of the cuboids. The total volume of the shape is greater than 180cm^3 and less than 200cm^3 . Which 2 cuboids could it be?
Cuboid A and Cuboid E
Cuboid A and Cuboid D
Cuboid D and Cuboid F
6. Cuboid C and which other cuboid have a combined volume of 384.8cm^3 ?
Cuboid F
