Science - Renewable and Non-Renewable Sources of Electricity

Task: Your task is to write the words for a narration on a TV programme on renewable and non-renewable sources of electricity.

If you are feeling brave why not record yourself hosting the TV programme. I would love to see you presenting 'Exciting Electricity'.

<p>1. Introduce yourselves and tell the audience what the programme will be about.</p> <p><i>Hello and welcome to! In this episode we will be....</i></p>	<p>2. Tell the audience about non-renewable ways of generating electricity.</p> <p><i>Some methods of generating electricity are non-renewable. This means...</i></p>
<p>3. Explain some renewable ways of generating electricity.</p> <p><i>There are some methods of generating electricity that are renewable, such as...</i></p>	<p>4. Give your audience any more information you think they need to know, then thank them for watching.</p> <p><i>Thank you for watching! We hope...</i></p>

You may want to use these words to help you:

electricity generate source energy renewable
non-renewable heat power steam
